

CHECKLIST: HOW FORTINET ADDRESSES SD-WAN REQUIREMENTS

For effective security and networking, the right SD-WAN solution must be implemented. Here's why Fortinet's Secure SD-WAN is the right choice for enterprises:

Next-Generation Firewall Protection

High-performance, proven security and SD-WAN networking in one device

Intelligent SD-WAN Networking

Intelligently balances internet and intranet traffic across available WAN services

Centralized Management

Visibility across the network and unified policy management across all branch/remote locations within a single pane of glass

Zero-Touch Deployment

Automatic device provisioning

Lower Total Cost of Ownership (TCO)

As much as 50% savings with less expensive connectivity plus simplified deployment and management

Detection and Remediation

Detection and remediation are key when threats slip through
